

DAVID SALAS CARRASCAL

Atlanta, GA | (404) 883-9215 | davidtnt970@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Georgia State University | Atlanta, GA

Bachelor of Science, Computer Science

May 2026

- GPA: 3.6: Software Development, Data Structures, Database Management Systems
- Organizations: SHPE (Society of Hispanic Professional Engineers), ACM (Association for Computing Machinery)

SKILLS

- **Programming Languages:** HTML, CSS, JavaScript, TypeScript, Python
- **Tools:** Git, GitHub, Vercel, Netlify, Docker, AWS, PostgreSQL, MongoDB
- **Frameworks & Libraries:** React, Express.js, Node.js, Flask, Tailwind CSS
- **Languages:** Spanish

WORK EXPERIENCE

CodePath | Tech Fellow | Atlanta, GA

Aug 2025 - Present

- Guided **20 students** to **100% project completion** through weekly 1:1 check-ins, troubleshooting HTML, CSS, and JavaScript.
- Recruited **40+ new members** in **2 months** and conducted **10 technical workshops** for **20 students**, driving program growth.

SensEat | Dr. Huadi Zhu | Undergrad Research Volunteer | Atlanta, GA

Aug 2025 - Present

- Spearheaded a 3-person undergraduate team to develop a novel bio-acoustic research app in **Kotlin** using **Android Studio**
- Engineered the core Android app to generate variable ultrasound frequencies and capture high-fidelity audio bounce-back, achieving a **99.5% signal capture rate** in lab tests.
- Automated audio analysis by integrating a Python script that **reduced data processing time by 90%**.

SHPE | Software Development Lead | Atlanta, GA

Aug 2024 - Present

- Built 12+ Arduino projects (e.g., radar with ultrasonic sensors, false Wi-Fi for cybersecurity, RFID security check) using C++ and Python to teach microcontroller concepts, resulting in a **25% increase in member retention**.
- Led a team of **3 developers** to launch the GSU SHPE chapter's online presence, implementing **JSON-LD schema** for better search visibility, increasing exposure to companies, and securing **\$1,500 in sponsorships**.
- Assisted **10+ SHPE members** during office hours with Python assignments in Data Structures & Algorithms and System-Level Programming, resulting in **average scores of 90%**.

Elys BMG | Information Systems Intern | Atlanta, GA

Jun 2024 - Oct 2024

- Minimized system downtime by remotely diagnosing and resolving technical issues for **100+ global clients**.
- Built an internal knowledge base by authoring **20+ technical guides** for novel issue resolution.

PROJECTS

TaskMate AI - CodePath | React, Express, PostgreSQL, API | [GitHub](#) | [Livesite](#)

Oct 2025 - Nov 2025

- Architected a full-stack productivity application integrating OpenAI's API to parse natural language inputs into structured tasks, **achieving 95% intent recognition accuracy** for automated scheduling.
- Engineered a high-performance REST API using Express.js and PostgreSQL with optimized SQL indexing strategies, **reducing data retrieval latency by 40%** for complex task queries.
- Designed a dynamic React frontend with intelligent drag-and-drop prioritization and real-time updates, **increasing user task completion rates by 25%** during beta testing.

Room To Grow - Hackathon | React, Express, PostgreSQL, API | [GitHub](#) | [Livesite](#)

Nov 2025

- Architected a full-stack AI tutoring platform using React and Node.js, integrating OpenRouter to aggregate **6+ Large Language Models** and provide dynamic model switching for diverse learning needs.
- Engineered a content generation engine that parses natural language into structured JSON, automatically creating personalized flashcards and quizzes to **reduce student study preparation time by 40%**.
- Implemented computer vision pipelines and real-time response streaming to analyze user-uploaded images and diagrams, **achieving sub-200ms latency** and enhancing the interactive learning experience.

Coffee Canvas - CodePath | React, Express, PostgreSQL, API | [GitHub](#)

Oct 2025

- Developed a full-stack coffee platform with full CRUD functionality using React, Express.js, and PostgreSQL.
- Engineered a dynamic, real-time price calculator and intelligent form validation to ensure **100% order accuracy**.
- Built and debugged an Express.js RESTful API, resolving critical 404 errors and correcting SQL statements to ensure data persistence
